The first he wrote and the last I purchased.

By Thomas(Doc Savage 45)

Like many I'm a JK follower. His writing and thoughts on woodworking are about the way we work with wood and why. Even how JK does it in this his first book which I didn't have but have since gone through it and gleaned some more wisdom. One thing that stood out for me is being my own teacher by not only observing what I am doing while I do it but paying close attention to my methods.

I now have all his books.

Exceeded Expectation

By James S. Hellman

This book exceeded my expectation. Previously I found the author to be a rambler. Meaning using a hundred words to express a thought or idea which could be stated with ten. In writing this book he still rambles, however he managed to keep my interest. Woodworkers who's are beyond the "How To" stage should find the book enjoyable.

Every woodworker should own ALL of the Krenov books. ...

By M. Rosendaul

Every woodworker should own ALL of the Krenov books. He spends a lot of time on the philosophy of building and design. This is not a "how-to" book with plans.
