good book written by a great man

By LUCstudent

I had taken Professor Gini's class with this as our primary text book. From the outset you can tell that this was a man who has very deep embedded ethics and knows very much about the world around us. His class was laden with various quotes from all the great thinkers, and this text book does the same. There are several real world case studies in the text book which deal with the ethical standards of business practices. The text book also touches on Kant's metaphysics. All in all it is a solid text book and a very simple read.
