Visual intensity

By wiredweird

Giger's work has incredible visual impact. He was the designer for the first Alien movie. He created that ambiguity of biota and machine. This book, with less concern for censorship, drives those images far beyond what the theaters can accept.

I read this book with a choked fascination. Giger uses all of his technical mastery in depicting landscapes of torment, eroticism, deformity, and beauty. This world is peopled by multiple beings, fused by birth, by force, or by carnality. His work reminds me of Druillet, where every scene is packed from edge to edge with bizarre detail. Giger goes beyond Druillet with his realistic style, making his monochrome worlds so much more convincing.

Although the Amazon web site lists Timothy Leary as a co-author, he just provides a one-page introduction. It's good, and it's Leary, but Leary fans shouldn't get their hopes up too far.

If you like Giger's work, as I do, this is an incredible collection. (If the imagery is too much for you, I understand.) This book also provides autobiographical notes, but I take those about as seriously as I take Salvador Dali's. It's the pictures that matter.
