The craziest thing is that it's all true

By Robert Kelley

"Life's Not Always in Times New Roman" is captivating. It's clear from the start of the book that a whole lot of work went into bringing these stories to life. De León had to go out and get to know these people. He had to find out everything he could about the journey life had taken them on. They trusted him with their stories and he portrayed them in an incredible way. I don't read as much as I should, but I couldn't put this book down. The only time I did set it down was to take a breath and realize that it was all TRUE. No matter where you're at in life, you'll get something out of this. It's an all-purpose manual with parallels the most common situations people face growing up, and overall a great read.

A heartfelt dash of inspiration

By lauren downie

Often the younger generations are underestimated in their ability to relate life experiences, but this book proves otherwise. I loved the great variety of relatable narratives and would recommend this book to my little sister, grandfather, neighbors, and everyone in between.
