### About the Author

Dr. Nahikian-Nelms is currently a professor of clinical health and rehabilitation sciences and director of the dietetic internship in the Division of Medical Dietetics at The Ohio State University. At Ohio State, she also serves as nutrition faculty for the LEND (Leadership Education in Neurodevelopmental Disabilities) program and the Inflammatory Bowel Disease Center. She has practiced as a dietitian and public health nutritionist for over 25 years. She is the lead author for the textbooks: *Nutrition Therapy and Pathophysiology*; *Medical Nutrition Therapy: A Case Study Approach*; and *Food and Culture*. Additionally, she has contributed to the Academy of Nutrition and Dietetics Nutrition Care Manual for the sections on gastrointestinal disorders and is the author of numerous peer-reviewed journal articles and chapters for other texts. Her clinical expertise focuses on development and practice of evidence-based nutrition therapy for a variety of conditions including diabetes, gastrointestinal disease, and hematology/oncology for both pediatrics and adult populations, as well as the development of alternative teaching environments for students within their clinical training. Recently, her scholarly work has focused on the use and development of simulation activities as a component of the dietetic curriculum. Dr. Nahikian-Nelms has received the Governor's Award for Outstanding Teaching for the State of Missouri, Outstanding Dietetic Educator in Missouri and Ohio, and the PRIDE award from Southeast Missouri State University in recognition of her teaching. Dr. Nahikian-Nelms has previously served in her district and state dietetic associations as well as on the ACEND board and as a program reviewer.

SARA LONG ROTH, PhD, RD, is Professor in the Department of Animal Science, Food and Nutrition and Director, Didactic Program in Dietetics at Southern Illinois University Carbondale. Prior to obtaining her PhD in health education, she practiced as a clinical dietitian for 11 years. Her specialty areas are medical nutrition therapy, nutrition education, and food and nutrition assessment. She is an active leader in national, state, and district dietetic association's where she has served in numerous elected and appointed positions, including the Commission on Accreditation of Dietetics Education, and Commission on Dietetic Registration. Dr. Long is coauthor of *Understanding Nutrition Therapy and Pathophysiology*, *Medical Nutrition Therapy: A Case Study Approach*, *Foundations and Clinical Applications of Nutrition: A Nursing Approach*, and *Essentials of Nutrition and Diet Therapy*. Dr. Long has received various awards and honors for teaching, including Outstanding Dietetic Educator (ADA) and Outstanding Educator for the College of Agricultural Sciences.

Every time is a great time to check out. It will improve your understanding, fun, enjoyable, driving lesson, as well as experience without investing even more cash. This is why on-line book Medical Nutrition Therapy: A Case Study Approach By Marcia Nelms, Sara Long Roth ends up being most desired.

# **MEDICAL NUTRITION THERAPY: A CASE STUDY APPROACH BY MARCIA NELMS, SARA LONG ROTH PDF**

Building a bridge from classroom to clinical practice, this casebook is composed of 34 realistic case studies appropriate for introductory and advanced level courses in nutrition and diet therapy. Each case study uses the medical record as its structure. The student "solves the case" by using the information provided such as hospital admission data, laboratory test results, intake/output records, and the physician's progress notes. The case is followed by a series of questions that focus on pathophysiology; assessment; clinical, nutritional and behavioral outcomes; interventions; and appropriate follow-up for the patient. This "real world" approach helps to prepare the student for the professional setting. Objectives for student learning within each case are built around the nutrition care process and competencies for dietetic education.

Missing and repeated pages and case studies!

By Cierra Neiwert

This book has a helpful hands on learning approach, HOWEVER be warned it was manufactured poorly! Case studies 16, 17, 18, and most of 15 were missing and case study 7-11 were repeated in my book. This is extremely frustrating to find out half way into the semester:(

3 of 3 people found the following review helpful.

utilize it! prepares you well

By Jessica Scordino

It really is a great tool when learning how to apply knowledge learned about how to assess a client. It includes an array of diseases and different client types which really aid in becoming familiar with all the different scenarios you could run into during practice

Good information and examples

By Dorothy A. Cadet

Bought the ebook version and I almost wish I had the hard cover case study book. Lots of good examples.
