Good basic book

By lne

My son likes this book, but it is kind of basic. Even though he is just 4 1/2, he wants more detail. He is very into the solar system and wants all the info. He was disappointed that the dwarf planets were not included.

Excellent!

By swiminakilt

I bought about 8 books for my daughter for Christmas. She immediately gravitated to this one! She is 5, and read it to my 3 year old who walked up to me and told me that the moon is made out of rocks. Worked for our family!

This book got my 4 year old hooked on planets. We read it at night and since he's got a shorter attention span, we stick to the main parts of the book but as he gets older I imagine he'll enjoy some of the more detailed information in the insets also. He can now identify all the planets and recently asked for his room to

be redone with planets and stars. It's a hit.
