This textbook is simply fantastic and one of the most completed books I have ever read on clinical chemistry and molecular diagnostics. The book provides very detailed information on clinical chemistry and molecular diagnostics. One of the features I like about the textbook is the text boxes at the end of the chapters that provide a brief overview of things to remember about the chapter. The only con if you even want to call it that, is that the sections for VI Hematology and Coagulation, section VII Microbiology, and section VIII Transfusion Medicine are online only, but who would cares the textbook for chemistry and molecular are a total of 1730 pages. Money well spent.
