Review

This is a fun, quick review of cytology cases that includes good discussions about additional diagnostics that can be used to complement the cytological findings and reach a definitive diagnosis on a case... The book also includes a list of additional texts that readers can refer to for information about veterinary clinical pathology. (3 stars)

?Amy MacNeill, DVM, PhD, DACVP, University of Illinois College of Veterinary Medicine, Doody's Review Service

From the Back Cover

Cytology is fast becoming a hands-on diagnostic procedure for the veterinary practitioner. This new volume in the Self-Assessment Colour Review series contains 165 clinical cytological cases encountered in a variety of diagnostic situations.

The cases are presented randomly, are illustrated by 267 photomicrographs in full color, and appear as self-assessment questions and detailed explanatory answers. Species covered mainly are dog, cat and horse with additional material on the cow.

The book offers a sampling of cytological features and patterns as an aid to study, revision and continuing education for veterinarians in practice and training, for veterinary students, nurses and technicians.
